**MEMORANDUM**

**FOR** : The OIC-PENR Officer  
**THRU** : The Chief, Technical Services Division  
**ATTENTION** : The Chief, Conservation and Development Section  
**FROM** : The CRFM Unit  
**SUBJECT** : **SUBMISSION CY 2023 FIRST QUARTER ACCOMPLISHMENT REPORT OF COASTAL RESOURCE AND FORESHORE MANAGEMENT UNIT RE: ICM MAINSTREAMING INTO THE CLUP**

Relative to mainstreaming of ICM approach into the CLUP, be informed that the CRFMU of this office conducted preliminary activities especially those included in the inception phase of the mainstreaming process such as coordination with the prospected LGU's (Gasan, Buenavista and Torrijos, Marinduque) regarding the status of each Comprehensive Land Use Plan (CLUP) Comprehensive Development Plan (CDP) and the Integrated Coastal Management Plan, whether adopted, updating or still a draft. *See Annex 1.*

In relation to this, our orientation meeting was held on January 31, 2023 via zoom facilitated by the CDD, CRFM Section. This meeting include overview of the ICM mainstreaming processes and related policies such as Technical bulletin No. 2022-02, guidelines provided for the conduct of the said activity/target. Highlights of the meeting include discussion on principles that form the foundation of ICM practices which are ecosystem based management that emphasizes the protection and restoration of the ecosystem structure, function and key processes, connectivity within and between systems (land and sea) as well as science based-planning. Another is the integration and coordination which include functional and policy integration while adaptive management principle include thoughts such as learning by doing, learning by experience and flexibility in the face of uncertainty, policy changes and political interventions and changes in public opinion. Discussion also tackled the ICM program and implementation process which mirrors the 12-step CLUP process. *(See figure1).* Likewise some of the clarifications of implementing team members were addressed during this meeting.

On the other hand, activities such as inventory and mapping of river systems influencing LMMPA within the LGU coverage will be undertaken together with ground validation of the inventoried river systems to identify key threats and issues as well as ENR profiling on the preceding quarters of CY 2023.

Likewise, monitoring tool on this activities were partially accomplished *(see annex 2)* to track weather the target activities are accomplished nor to be accomplished.

For information and record.
