Forwarded is the memorandum dated February 27, 2023 of CENRO Sablayan regarding report on Biodiversity Monitoring System (BMS) conducted for the 1<sup>st</sup> Semester CY 2023 of Mt. Calavite Wildlife Sanctuary.

Based on the results of BMS conducted for the first semester of CY 2023 showed that all priority monitoring species was observed using the methods of Focus Group Discussion and Field Diary. On Field Diary it was observed that the recorded individual priority monitoring species differs in the two (2) monitoring periods as shown in Table 4.2-2. One (1) species among the 5 priority monitoring species greatly increased, this is the Mindoro Tarictic Hornbill (*Penelopides mindorensis*). It was also noted that there were more species recorded this semester compared to first semester of CY 2022.

There were three (3) issues encountered during the conduct of Biodiversity Monitoring System (BMS) for the 1<sup>st</sup> Semester 2023 such as threats and pest to planted crops; potential damages brought by construction within MCWS and possible loss of water resources. The PAMO of MCWS has recommended action to address these issue.

Attached herewith are the photos and annexes for the said activity.

For information and record.

For the OIC, PENR Officer:
