NARRATIVE REPORT ON WOOD LUMBER AS REQUESTED BY DANGAY NATIONAL HIGH SCHOOL to DENR-San Mariano 6 Years Ago

School facilities play a crucial role in creating a conducive learning environment for students. They provide students with the necessary resources and tools to enhance their learning experience. Adequate facilities such as libraries, computer labs, science labs, sports facilities, and learning parks allow students to explore their interests and develop their skills. A well-maintained environment also promotes a positive attitude towards learning and encourages students to take pride in school. In short, school facilities are essential for ensuring that students receive a high-quality education and are well-equipped to face the challenges of the future.

Thus, in the year 2017 Dangay National High School requested an assistance from DENR-San Mariano such as lumbers to be used in improving different learning parks. The lumber given by DENR was made signages for Math Park, Science Park, SSC Park and other learning parks. Some of these lumbers were made as cabinets, bookshelves, frames, etc which is very useful to have conducive learning environment that supports students learning and well-being.

However, many of these lumbers were not used because most of it were deteriorated and decomposed and were not useful in making tables, chairs, and cabinets.

In view of this, we attached some pictures of where those lumbers were used.

Madam:

Mabuhay!

Amidst the full implementation of Senior High School program in our basic education system, Dangay National High School is facing a bulk of challenges not only to human but more importantly, material resources. The school has to ensure that furniture and fixtures are in place in the skill laboratories and ancillary offices to better provide a better and safer educational environment to the learners.

Just recently, we have observed that a number of trees along the Strong Republic Nautical Highway here in Dangay were cut down due to the road widening and improvement activity.

In view of this, we would like to humbly request that the lumber from said trees be given to Dangay National High School to be used for additional laboratory tables and tool shelves for classes in dressmaking, cookery, electrical installation and maintenance as well as cabinets for files and equipment in the ancillary offices

Thank you so much and we will be grateful if this request merits your affirmative response. More power and God bless.

Very truly yours,

TESSIE G. BOONGALING
